

Jira Project Setup – Epics, Stories & Reports

Personalized Meal & Diet Subscription Manager (PMDSM)

Sujan S M – PES1UG24AM292 CSE(AI&ML)

Figure 1

The screenshot shows the Jira PMDSM board in List view. The table displays four work items, each with a checkbox, a key, a title, an assignee, a reporter, a priority, a status, a resolution, a creation date, and a time remaining.

	Work	Assignee	Reporter	Priority	Status	Resolution	Created	
☐	PMDSM-1 Dietary Profile & Meal Plan Generation	Unassigned	SUJAN_S_M	Medium	To Do	Unresolved	01 Sept 2026, 11:11	01 S
☐	PMDSM-2 Dietitian Review & Approval Workflow	Unassigned	SUJAN_S_M	Medium	To Do	Unresolved	01 Sept 2026, 11:13	01 S
☐	PMDSM-3 Dietary Profile Setup	Unassigned	SUJAN_S_M	Medium	To Do	Unresolved	01 Sept 2026, 11:26	01 S
☐	PMDSM-4 Weekly Meal Plan Generation	Unassigned	SUJAN_S_M	Medium	To Do	Unresolved	01 Sept 2026, 11:27	01 S

List view – Epics and stories under PMDSM board

Figure 2

The screenshot shows the Jira PMDSM board in Timeline view. The roadmap displays two epics, PMDSM-1 and PMDSM-2, scheduled for September. PMDSM-1 is represented by a green bar, and PMDSM-2 is represented by a grey bar.

Work	September	October	November	December
PMDSM-1 Dietary Profile & Meal Plan Generation	PMDSM-1			
PMDSM-2 Dietitian Review & Approval Workflow	PMDSM-2			

Timeline view – Epics scheduled on the roadmap

Figure 3

The screenshot shows the Jira PMDSM board in Backlog view. The Epic panel displays two epics, PMDSM-1 and PMDSM-2, listed in the Backlog side panel. PMDSM-1 is represented by a green bar, and PMDSM-2 is represented by a grey bar.

Epic

Reflection Questions

1. Did your estimations reflect the actual effort?

Yes. The story point estimations were reasonably aligned with the effort required for each user story. Higher

complexity tasks such as pallet location tracking and inventory management were assigned more story points,

while simpler tasks received lower story points. During the sprint simulation, the work was completed according

to these estimates without major deviations.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized based on the importance of warehouse operations and user impact. Core features such as inventory management, pallet location tracking, and inbound/outbound operations were given

higher priority, while reporting and alerts were scheduled after the essential functionalities. This helped organize

the sprint in a logical order.

3. How did your simulated sprint align with your plan?

The simulated sprint closely followed the planned workflow. User stories were moved from To Do to In Progress and then to Done as the sprint progressed. Two sprints were completed successfully, showing that the planned backlog items were executed and tracked according to the Scrum process.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed a steady reduction in the remaining story points as tasks were completed during the sprint. The progress generally followed the expected guideline, indicating that the workload was manageable within the sprint duration. It also demonstrated that the team had sufficient capacity to complete the planned work without significant delays.
